

Zest Creations

ZEST CREATIONS TECHNOLOGIES.

Empowering Agencies and Prime Contractors to Operate with Confidence, Resilience & Compliance

CAPABILITY STATEMENT

CORE COMPETENCIES

Zest Creations Technologies provide compliance-driven IT Management, Cybersecurity, and Cloud Hosting for government and enterprise clients. Its flagship ecosystem, GovSecure360™, is FedRAMP Moderate-aligned and CMMC Level 2-ready—integrating cybersecurity, cloud, and governance automation to simplify audits and accelerate modernization.

Cybersecurity	Risk	Storage
Compliance	Automation	Monitoring
Engineering	Resilience	Analytics
Cloud	DevSecOps	Integration
Infrastructure	Virtualization	Modernization
Governance	Networking	Management
Training	Support	Innovation

GovSecure360™ Platform

Contract number: ZC-CMMC-2025-19

Contract value:

From To
09/09/2024 08/15/2025

\$250,000

Buffa

Contract number: 75F40125C0001

Contract value:

From To
02/12/2024 05/22/2024

\$25,000

AfroBizGermany

Contract number: 75F40125C0003

Contract value:

From To
07/17/2023 12/07/2023

\$28,000

DIFFERENTIATOR

We Turn Compliance Into Competitive Advantage. While others treat compliance as a cost, we engineer it as value. Our systems make FedRAMP, CMMC, and ISO controls profitable — turning audit requirements into automation frameworks that accelerate delivery and lower total cost of ownership.

We Engineer for Trust, Not Just Technology.

Every product, every workflow, and every client relationship is designed around assurance. Our clients don't just get services — they gain a transparent, verifiable chain of trust from architecture to evidence. We call it TrustOps™.

Our Team Operates Like a Special Operations Unit.

Small, elite, and mission-focused — no bloated org charts, no long chains of approval. Every member of Zest Creations is trained to think and act like a compliance strategist, not just an engineer. We execute with precision, accountability, and urgency.

We Don't Chase Certifications — We Build Systems that Pass Them.

Most firms rush to check boxes. We reverse-engineer entire environments so that auditors find readiness built-in, not staged. That's why we self-attest to FedRAMP Moderate — because we architect for auditability from day one.

At Zest Creations, we don't just meet standards — we design ecosystems that redefine them.
